Scientists are afraid that they have opened the gates of hell. A geological group who drilled a hole about 14.4 kilometers (about 9 miles) in the crust of the earth are saying that they heard human screams. Screams have been heard from the condemned souls from earth's deepest hole. Terrified scientists are afraid they have let loose the evil powers of hell up to the earth's surface.

"The information we are gathering is so surprising that we are sincerely afraid of what we might find down there," stated Mr. Azzacov, the manager of the project to drill a 14.4 kilometer hole in remote Siberia.

"The geologists were dumbfounded. After they had drilled several kilometers through the earth's crust, the drill bit suddenly began to rotate wildly. "There is only one explanation--that the deep center of the earth is hollow," the surprised Azzacov explained. The second surprise was the high temperature they discovered in the earth's center. "The calculations indicate the given temperature was about 1,100 degrees Celsius, or over 2,000 degrees Fahrenheit," Dr. Azzacov points out. "This is far more than we expected. It seems almost like an inferno of fire is brutally going on in the center of the earth.

"The last discovery was nevertheless the most shocking to our ears, so much so that the scientists are afraid to continue the project. We tried to listen to the earth's movements at certain intervals with super-sensitive microphones, which were let down through the hole. What we heard, turned those logically thinking scientists into a trembling ruins. It was sometimes a weak, but high pitched sound which we thought to be coming from our own equipment," explained Dr. Azzacov. "But after some adjustments we comprehended that indeed the sound came from the earth's interior. We could hardly believe our own ears. We heard a human voice screaming in pain. Even though one voice was discernible, we could hear thousands, perhaps millions, in the background, of suffering souls screaming. After this ghastly discovery, about half of the scientists quit because of fear. Hopefully, that which is down there will stay there," Dr. Azzacov added.
